FEMA Region 6 Weather Threat Briefing

Saturday July 17, 2021

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information.

To find your local NWS forecast office, go to www.weather.gov/srh.

NWSSouthern

www.weather.gov/srh

- **Isolated heavy rain/flash flooding possible over NE OK/NW AR as well as SE AR/NE LA today.**
- **On Sunday, isolated heavy rain possible across portions of Region 6. A few strong to severe storms are also possible over N-Central OK; damaging winds and hail are the main threats.**
- **By Monday, isolated heavy rainfall possible over NE TX into the ArkLaTex Region.**
 - **Heavy rainfall threat likely to continue over Texas on Tuesday into Wednesday.**

FEMA Region 6 Threat Matrix

Jul 17, 2021 - Jul 21, 2021

SR ROC
REGIONAL OPERATIONS CENTER

DAY / THREAT	Sat	Sun	Mon	Tue	Wed
Severe Storms		N-Central OK			
Heavy Rain / Flash Flooding	NE OK/NW AR SE AR/NE LA	NM,OK,AR, N LA	NE TX,ArkLaTex	TX	TX
Fire Weather					
Tropical Winds / Surge					
Heat					
River Flooding	NE OK	NE OK	NE OK	SETX	SETX
	ETX	ETX	ETX		

	No Weather Threats Expected
	Very Common – Happens Often
	Common – Happens Frequently
	Uncommon – A Few Times a Year
	Rare – Once Every 1-5 Years
	Very Rare – Once Every 5-10 Years

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

For more details on the colors in the threat matrix refer to the last slide in this briefing.

5-Day Precipitation Forecast & River Flood Status

SR ROC
REGIONAL OPERATIONS CENTER

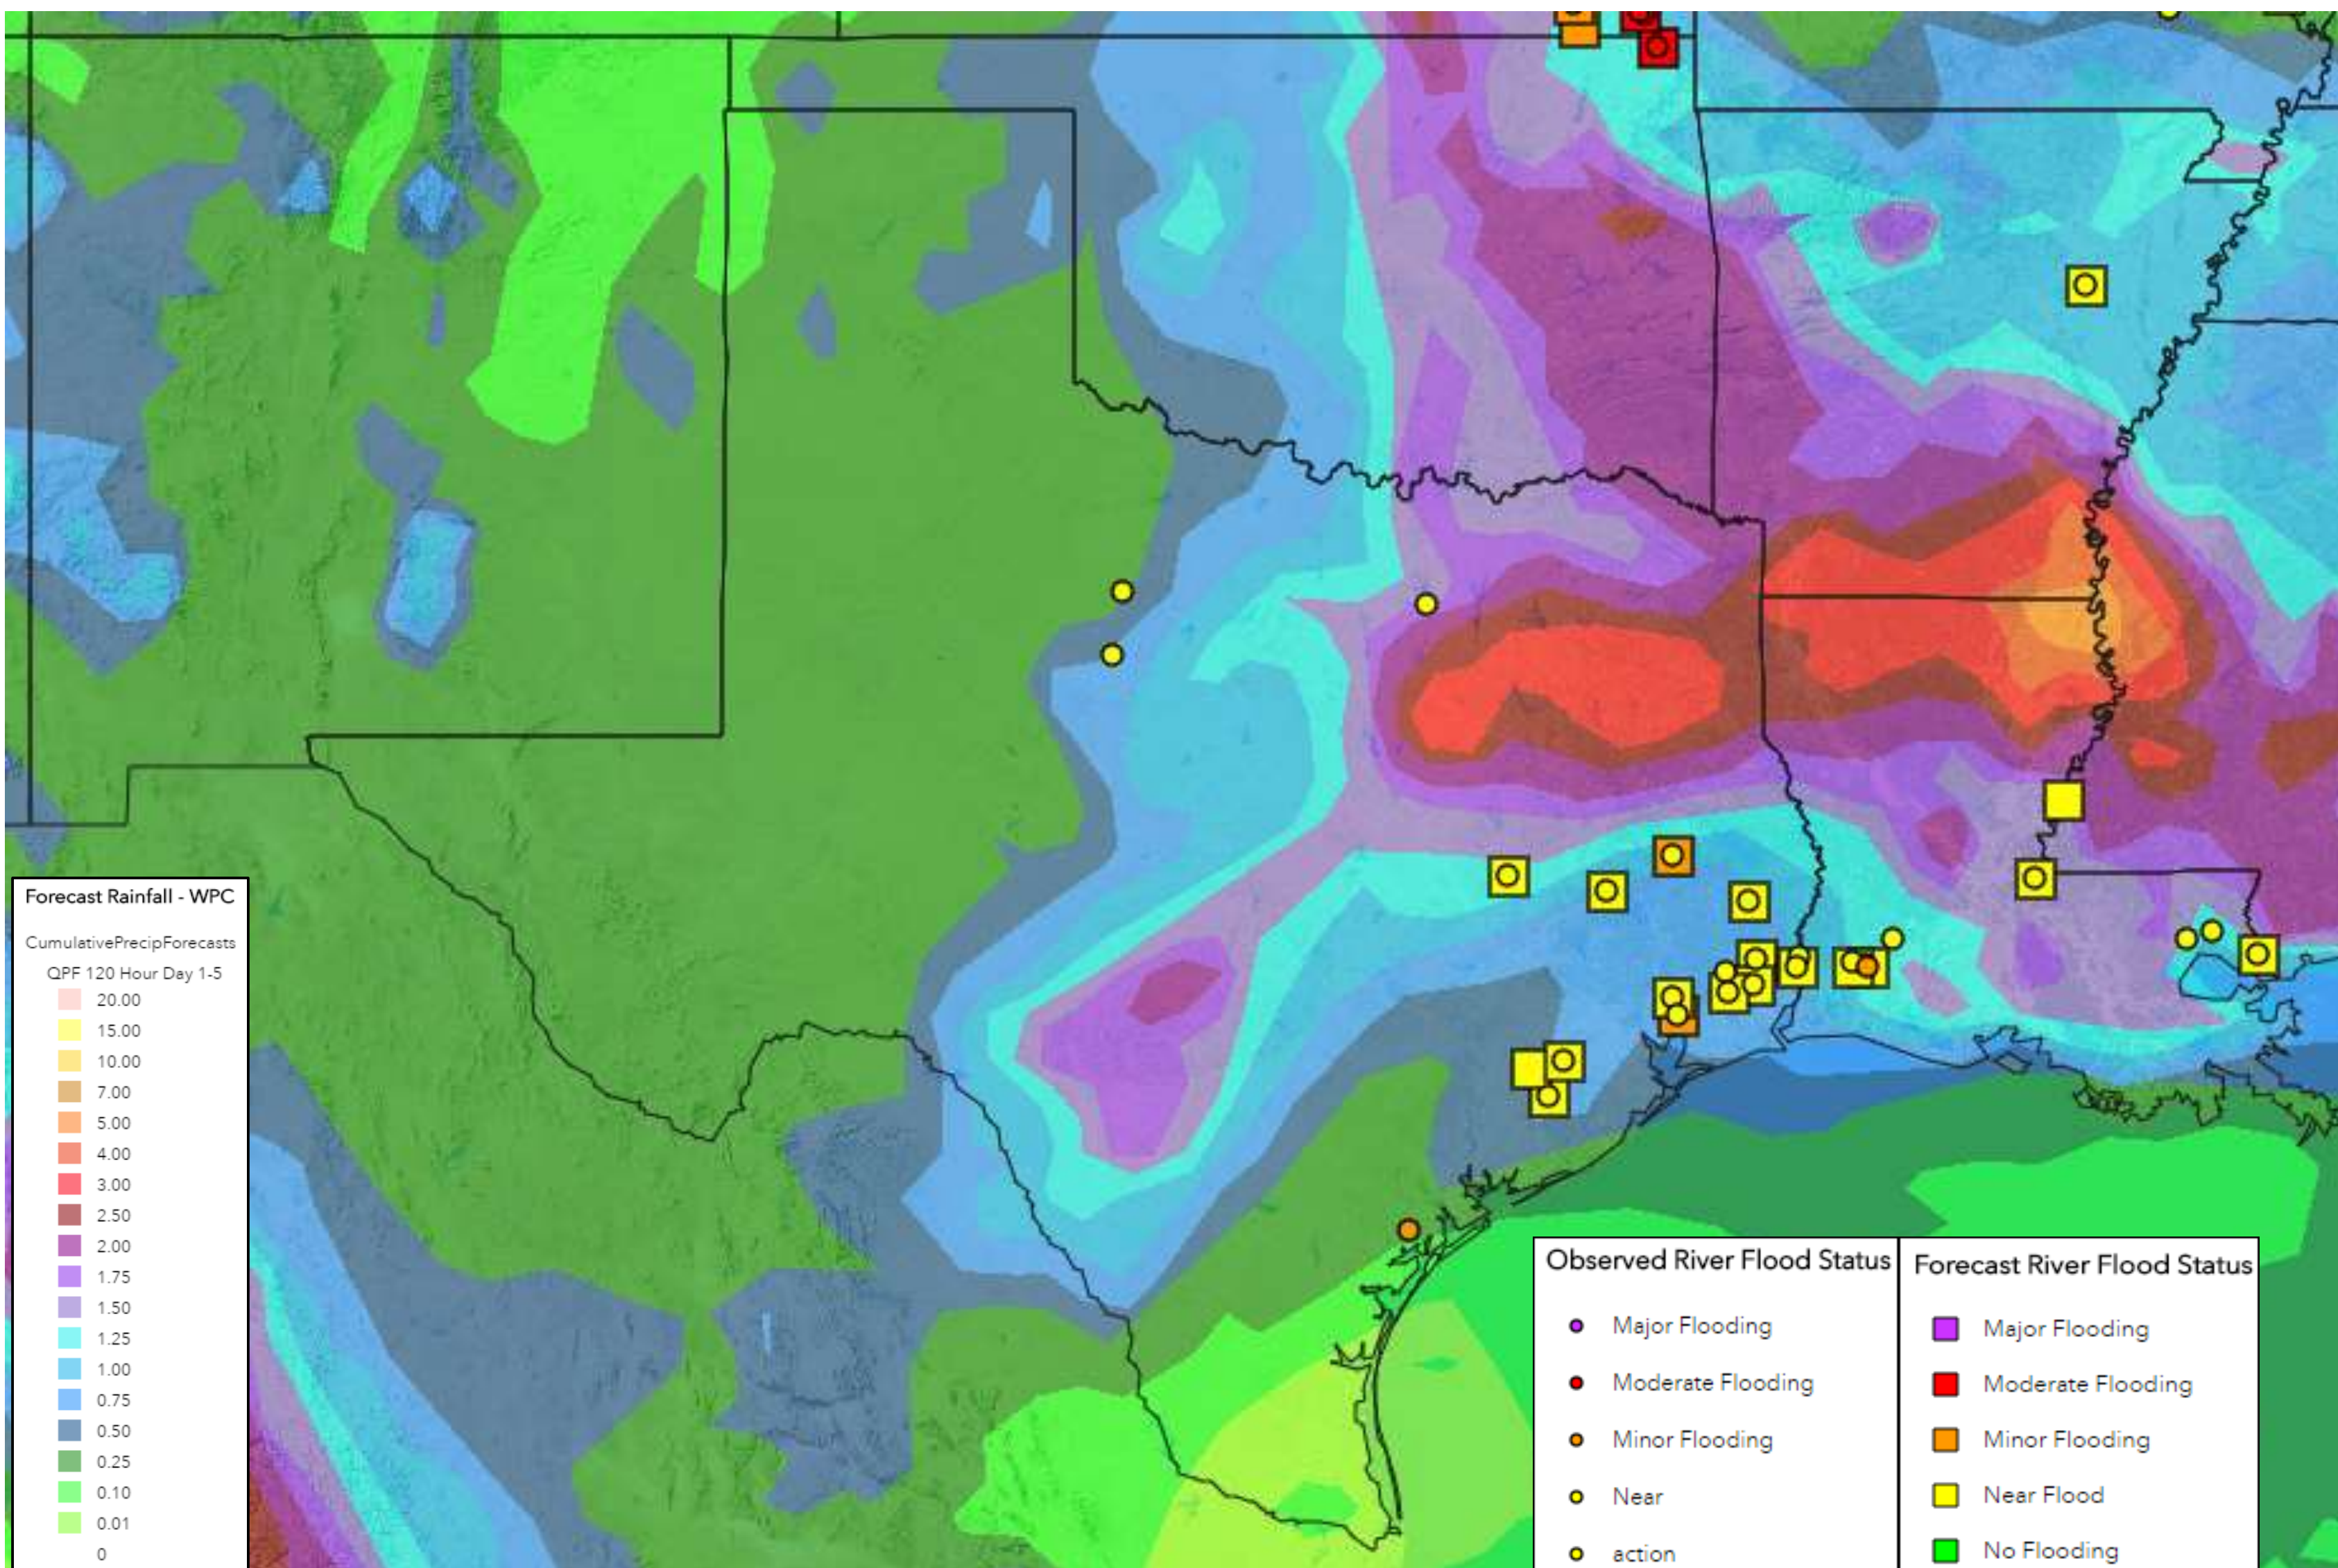

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

The Neosho River near Commerce in NE OK is in moderate flood stage through Monday. As it crests on Sunday, low lying areas around Miami become cut off from easy access. Riverview Park experiences moderate flooding. State Highway 125 near the fairgrounds will be threatened.

The Trinity River near Moss Bluff in SE TX is forecast to slowly rise into minor flood stage late Monday. As it crests the middle of next week, minor lowland flooding begins in the vicinity of the gage.

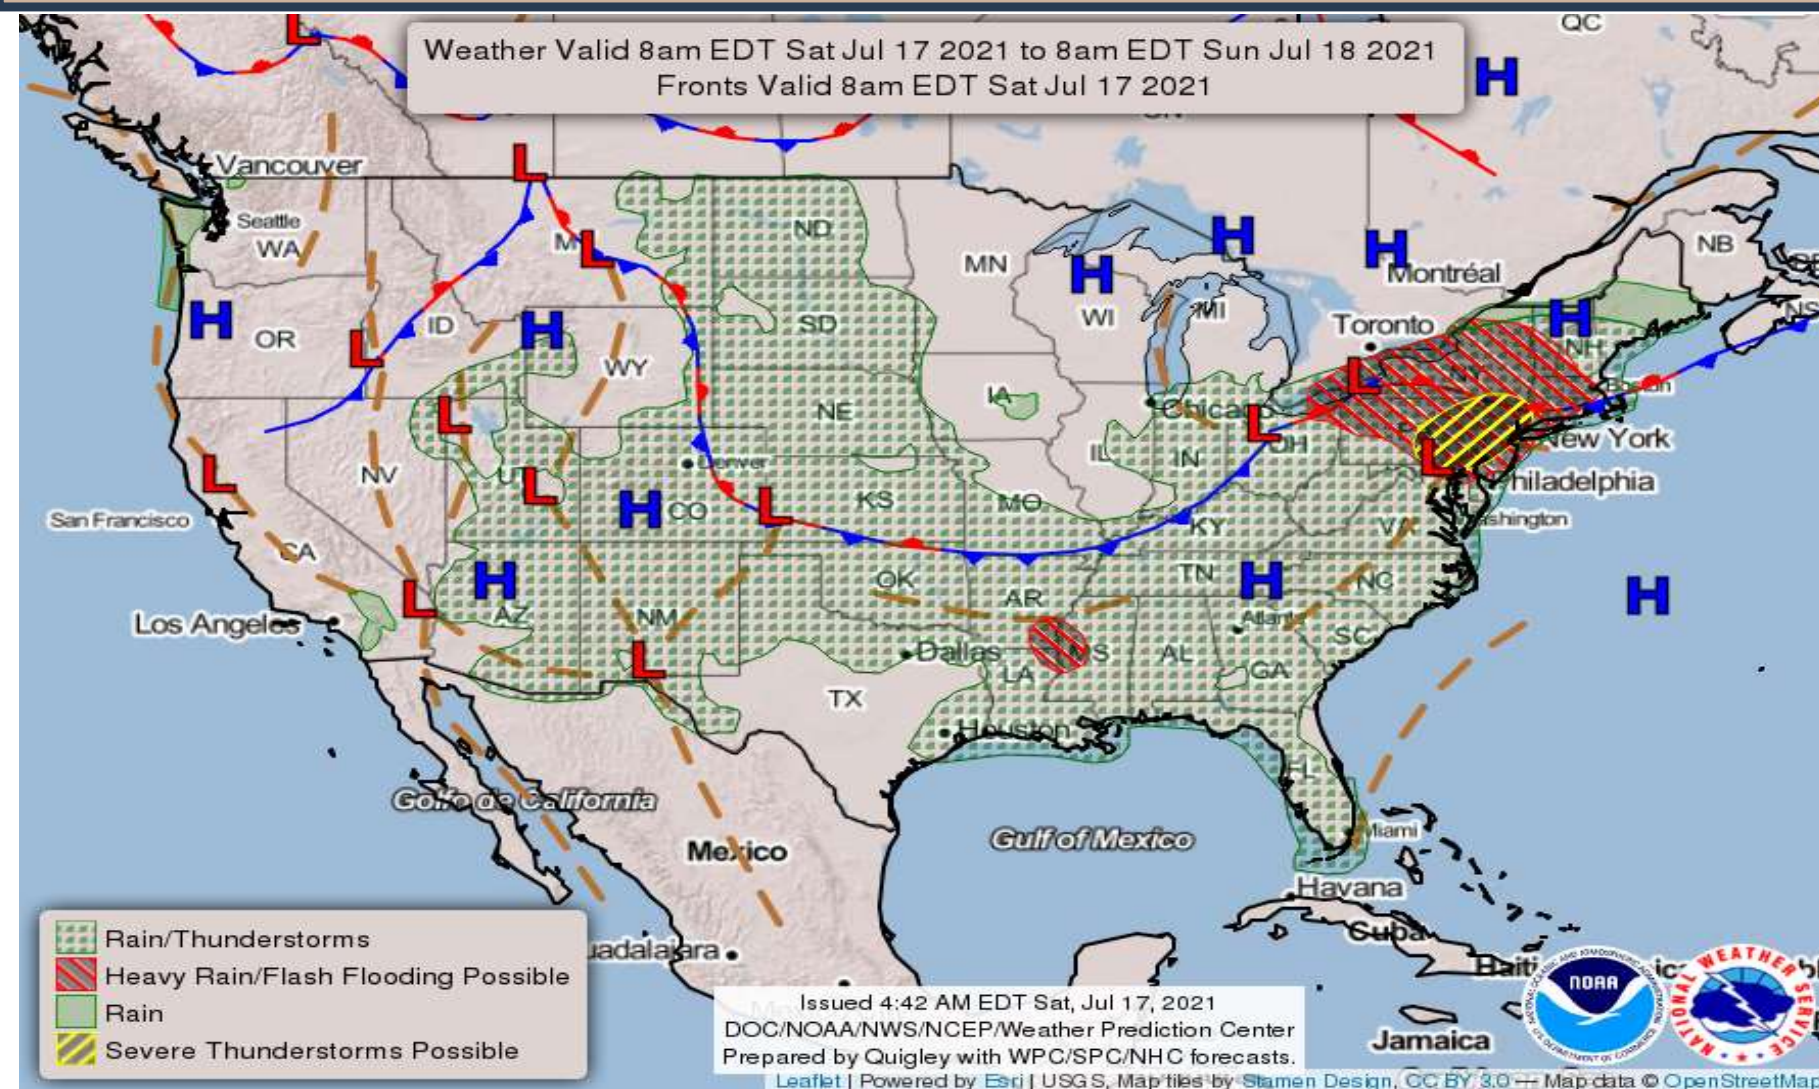

The Neches River near Diboll in E TX is forecast to rise into minor flood stage today with lowland flooding and flooded boat ramps and trails expected.

Forecast rainfall is not expected to produce significant river flooding.

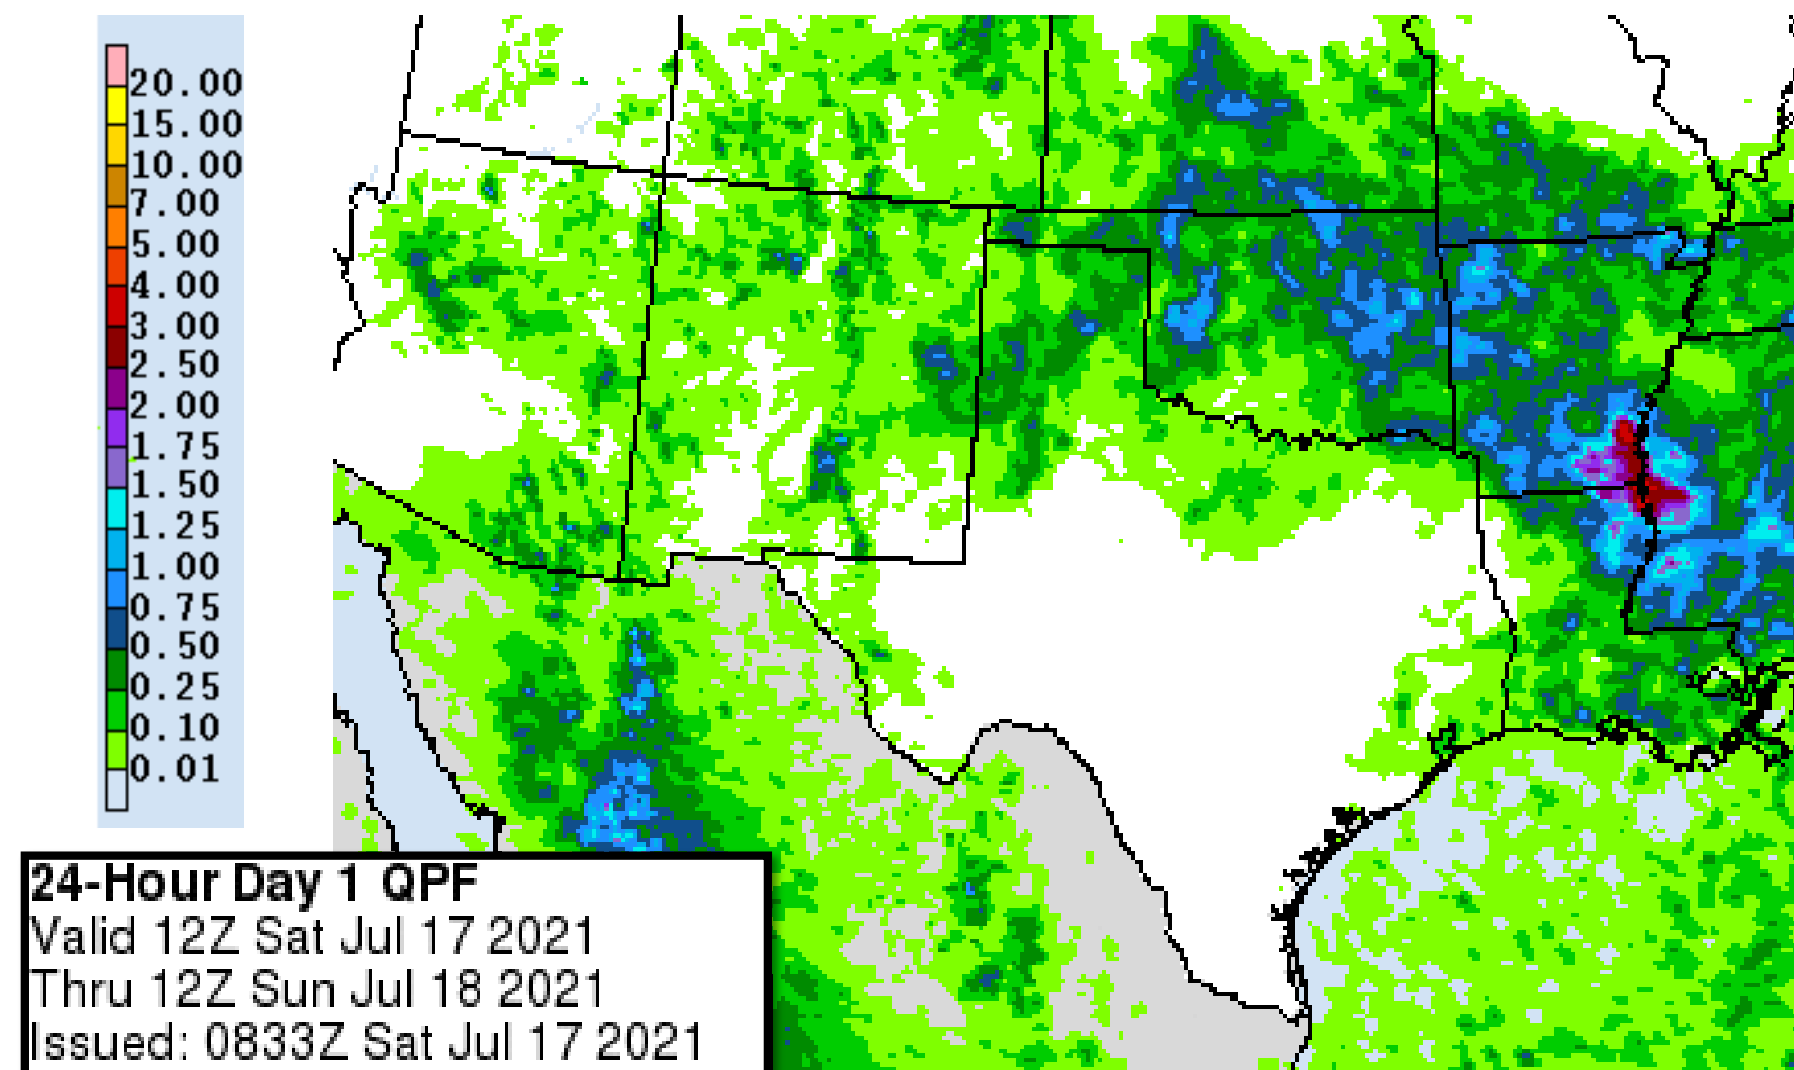

Today's Weather

Forecast Chart

Forecast Rainfall

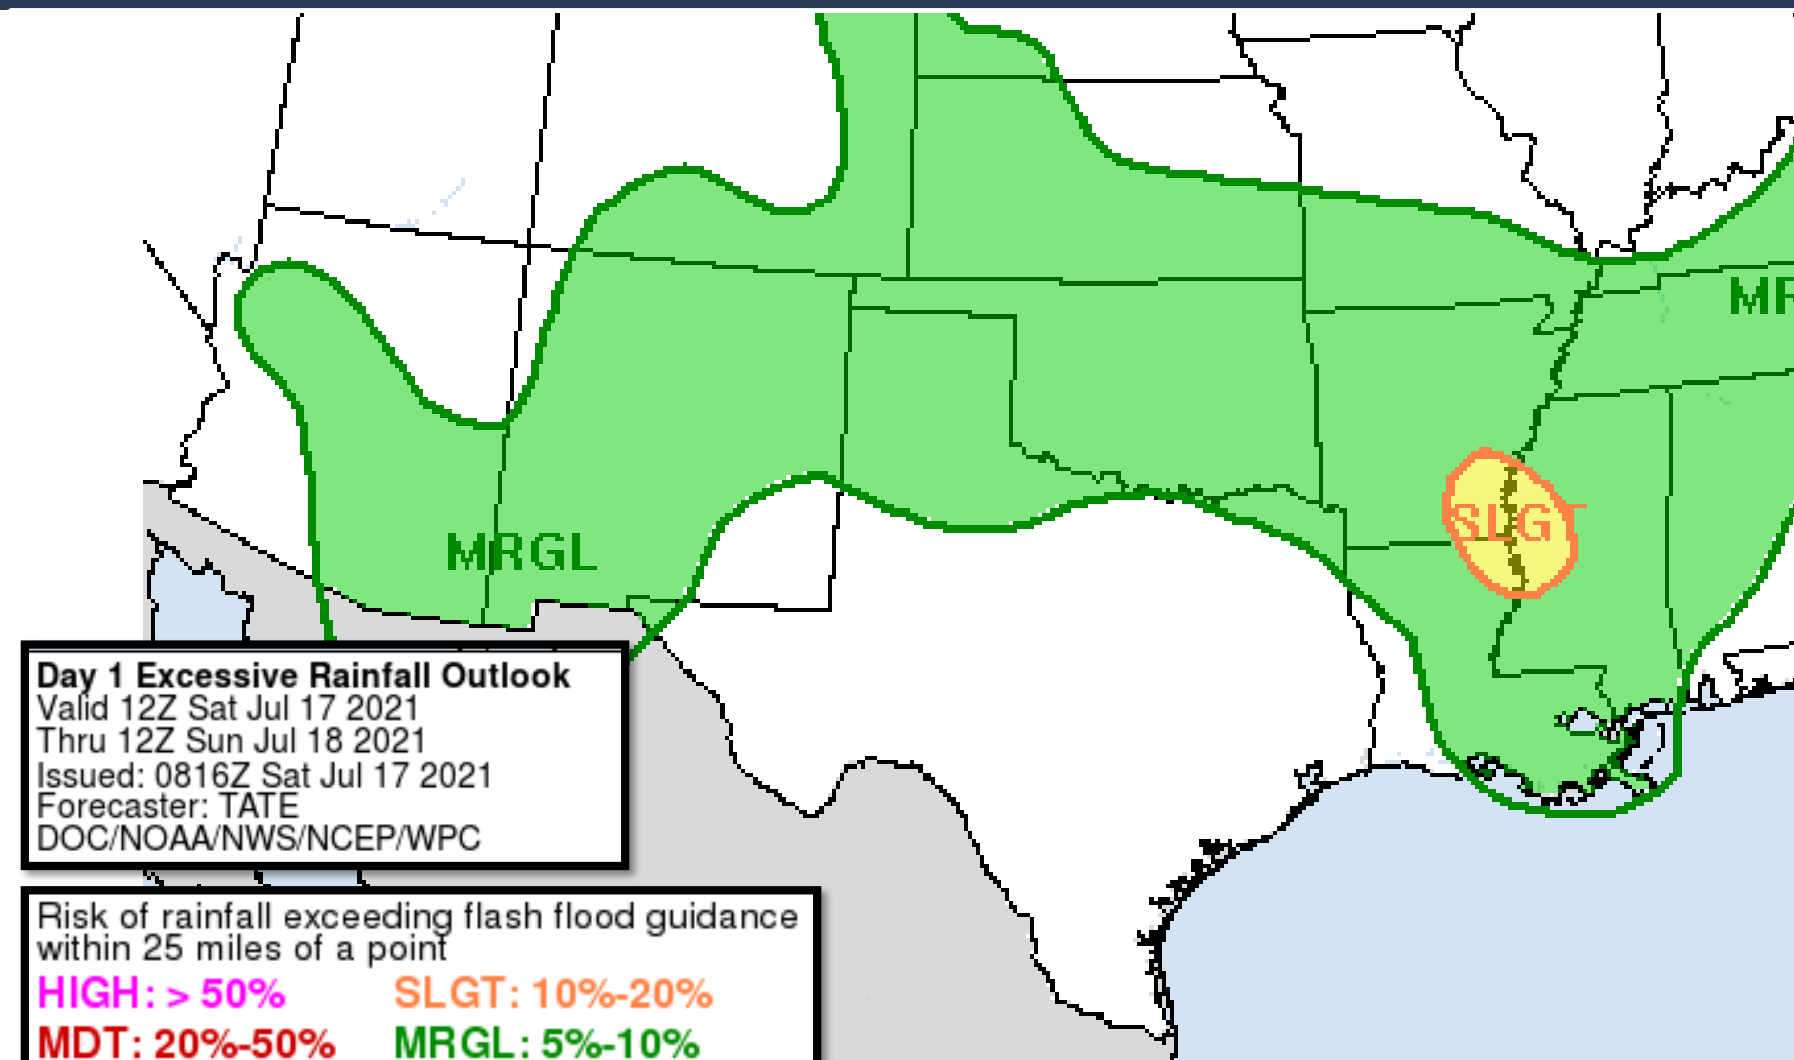

Isolated heavy rainfall/flash flooding possible over NE OK/NW AR as well as SE AR/NE LA.

Weather “Threat” Matrix			
Color	Definition	Criteria	Example(s)
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul style="list-style-type: none"> Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as <u>seabreeze</u> storms in coastal TX
Yellow	Somewhat Common – Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul style="list-style-type: none"> 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Uncommon – A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul style="list-style-type: none"> A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul style="list-style-type: none"> A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul style="list-style-type: none"> A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms

Criteria for the color codes in this briefing is to the left, please provide any feedback to
